CHAPTER 1 — INTRODUCTION

1.1 Purpose of the CRM

Ccentrik CRM is a cloud-based Customer Relationship Management platform designed specifically for B2B sales teams in the technology and SAP services industry. It provides a single, unified workspace to manage prospects, leads, deals, activities, meetings, and daily sales reporting — enabling your sales team to work efficiently and your managers to stay informed in real time.

The platform is accessible from any device with a browser and an internet connection. No software installation is required.

1.2 Who Should Use It

Ccentrik CRM is designed for everyone involved in the sales process:

User Type	Primary Use
Super Admin (Owner)	System configuration, user management, full oversight
Sales Head	Team oversight, reports, DSR, approvals
Sales Manager	Team activity monitoring, record management
Sales Employee	Managing own leads, deals, and activities

User Type	Primary Use
Inside Sales Employee	Phone and email outreach, lead follow-up

1.3 Business Workflow Overview

The typical workflow in Ccentrik CRM follows this path:

1.4 Key Benefits

- Centralized data — All customer and prospect information on

CHAPTER 2 — GETTING STARTED

2.1 Login Process

Open your browser and go to: <https://ccentrik-crm.web.app>

You will see the Ccentrik login screen.

Step 1: Enter your username (your first name or assigned username — do NOT type @ccentrik.com, the system adds it automatically).

Step 2: Enter your password.

Step 3: Click Sign In.

Alternative: Click Sign in with Google if your organisation uses Google Workspace with a @ccentrik.com account.

[Login Screen Screenshot]

2.2 Dashboard Overview

After login, you are taken directly to the Dashboard — your central command centre. The Dashboard shows:

- Key performance indicators (KPI cards) at the

top

- Your activities

for today, overview of items, a roundup of coming events

- Pipeline

2.3 Navigation

Sidebar (Left Panel)

The sidebar is your main navigation menu. Click any item to open that module. On mobile devices, tap the hamburger menu in the top-left to expand the sidebar. The sidebar can be collapsed to icon-only view by clicking the arrow at the bottom.

Header (Top Bar)

The header contains:

Click your avatar then select Logout. Your session ends immediately. For security, always log out when using a shared computer.

CHAPTER 3 — USER ROLES & PERMISSIONS

3.1 Overview

Ccentrik CRM uses a five-tier role system. Your role is assigned by your Super Admin and determines which modules you can access, which records you can see, and what actions you can take.

3.2 Role Descriptions

Super Admin (Owner)

The highest level of access. Typically assigned to the business owner or IT administrator.

- Access:
All modules and features
- Can:
Create/delete users, configure system settings, view all records, lock/unlock any record, access security logs, settings, for all users, configure

Export Data	Yes	Yes	Limited	No	No

CHAPTER 4 — DASHBOARD

The Dashboard is the first screen you see after login. It provides an at-a-glance view of your day, your pipeline, and your team's performance.

[Dashboard Screenshot]

4.1 KPI Strip (Top Metric Cards)

Four key numbers are displayed at the very top of the Dashboard:

Card	What It Shows	Why It Matters
Pipeline Total Value	Combined estimated value of all active pipeline entries	Shows total opportunity in the funnel
Total Leads	Number of active qualified leads	Tracks inbound and outbound lead volume
Active Deals	Number of open deals in progress	Indicates current revenue opportunities
Revenue Won	Total revenue from closed-won deals this period	Measures actual sales performance

4.2 Smart Activity Strip

This tabbed panel organises all your tasks and follow-ups into clear categories:

4.3 My Activities Widget

Shows your top 10 open activities. Click any item to open its detail view. This widget is your personal to-do list.

4.4 Pipeline Health Chart

A visual progression chart showing how many prospects are in each stage:

New > Contacted > Meeting > Proposal > Negotiation > Won

This helps you identify where prospects are getting stuck and which stage needs the most attention.

4.5 Upcoming Meetings Widget

Shows your next 5 scheduled meetings with:

- Meeting title and client name
- Date and time
- Mode indicator (Virtual / In-person)

so
n)

Click any meeting to view its full details.

4.6 Deals Needing Action

This widget helps managers spot overloaded or underperforming team members at a glance.

CHAPTER 5 — CRM MODULES

5.1 Pipeline (Prospects)

[Pipeline Screenshot]

Overview

The Pipeline module is where you record all potential clients before they are formally qualified as leads. Think of it as your prospecting database — companies you are researching, targeting, or have made initial contact with.

Pipeline Stages

Stage	Meaning
New Prospect	Just identified; no contact made yet
Attempted Contact	Reached out but no response
Engaged	Prospect has responded or shown interest
Qualified	Confirmed fit; ready to convert to Lead
Not Interested	Prospect has declined or is not a fit

5.2 Leads

[Leads Screenshot]

Overview

Leads are qualified prospects who have shown genuine interest in your services. They can be created directly or converted from the Pipeline module. Each lead is tracked through stages from first contact to conversion into a deal.

Lead Stages

Stage	Meaning
New	Lead just added; initial contact not made
Contacted	Initial outreach made
Qualified	Budget, authority, need, and timeline confirmed
Proposal	Proposal or quote has been sent
Converted	Lead has become an active deal
Won	Successfully converted to client
Lost	Lead did not progress further

Lead Temperature

Temperature	Meaning
Hot	Very likely to convert; needs priority attention
Warm	Interested but not yet committed
Cold	Low interest or slow to respond

Lead Score (0 to 100)

Each lead is automatically assigned a score based on:

A unique code such as LEAD-0042 is auto-generated for every lead.

Key Actions

Action	Description
Edit	Update lead details
Mark Proposal Sent	Moves lead to Proposal stage and optionally creates a Deal
Convert to Deal	Directly creates a linked Deal record
Change Temperature	Quick toggle between Hot, Warm, and Cold
Import	Bulk-add leads via CSV
Export	Download all leads as CSV
View Activity History	See all logged activities for this lead
Bulk Status Change	Select multiple leads and change stage or temperature together

5.3 Deals

[Deals Screenshot]

Overview

The Deals module tracks active sales opportunities that have progressed beyond the lead stage. Deals can be viewed as a Kanban board with visual drag-and-drop, or as a standard table list.

Deal Stages and Win Probability

Stage	Win Probability
New	5%
Contacted	15%
Meeting Scheduled	30%
Proposal Sent	50%
Negotiation	75%
Won	100%
Lost	0%

Deal Health Indicators

Status	Meaning
Active	Updated within the last 3 days
At Risk	Not updated in 3 to 7 days
Stale	Not updated in 7 or more days

Creating a Deal

Converting a Won Deal to Customer

After marking a deal as Won, click Convert to Customer to create a formal customer record.

Reverting a Deal

A deal can be reverted:

- B
ack
to
Le
ad

(if it was converted from a lead)
• Back to Pipeline (if it was converted from a pipeline entry)

5.4 Activities

[Activities Screenshot]

Overview

Activities are the core records of every customer interaction — every call made, email sent, meeting held, or follow-up scheduled. The Activities module is your complete interaction history and personal task manager.

Activity Types

Type	Description
Call	Outbound or inbound phone call
Follow-up Call	Scheduled callback after previous contact
Email	Email sent to prospect or lead
Follow-up Email	Follow-up to a previous email
Meeting Virtual	Online video meeting
Meeting In-Person	Face-to-face meeting
WhatsApp	WhatsApp message or chat
WhatsApp Follow-up	Follow-up via WhatsApp
Note	Internal note or memo
Break	Scheduled break for tracking purposes

Logging an Activity

1. Click + Add Activity
2. Select the activity Type
3. Enter a Title
4. Set Priority: Urgent, High, Medium, or Low
5. Set Status: Pending, In Progress, or Completed
6. Set Due Date and Time

7. Link to a Lead or Deal (optional but strongly recommended)

8. Assign to a team member (manager only)

9. Add a Description with notes, outputs, and agenda

10. Click Save

[View Modes](#)

Timeline View: Activities grouped by time period — Overdue, Today, Tomorrow, Upcoming, Completed. Best for daily task management.

Table View: All activities in a sortable, filterable table. Useful for reporting and audit.

Kanban Board: Four columns — To-Do, In Progress, Completed, and Overdue. Drag cards between columns to update status.

Calendar View: Activities plotted on a monthly calendar. Best for visualising your schedule.

User Grouped View: Activities organised by team member, then by date. Useful for managers reviewing team workload.

Smart Filters

Filter	Shows
Today	All activities due today
Meetings Today	Only meeting-type activities today
Follow-ups Due	Overdue follow-ups requiring action
High Priority	Urgent and High priority items only
Lead Activities	Activities linked to your assigned leads
Deal Activities	Activities linked to your assigned deals
Recently Added	Activities created in the last 48 hours

5.5 Meetings

[Meetings Screenshot]

Overview

The Meetings module manages all scheduled client and internal meetings. It supports virtual (online) and in-person meetings, sends calendar invites automatically, and tracks outcomes.

Scheduling a Meeting

1. Click + Schedule Meeting

Log Follow-up

After any meeting, click Log Follow-up to instantly create a new meeting pre-filled with the same client details. This saves time when scheduling the next interaction.

5.6 DSR — Daily Sales Report

[DSR Screenshot]

Overview

The Daily Sales Report (DSR) is an automated email sent to managers and owners each evening summarising the day's sales activity. It covers the entire team's performance.

What the DSR Shows

- New leads added during the day
- Pipeline entries created
- Deals won and lost (with value)
- Activities

5.7 Reports

[Reports Screenshot]

Overview

The Reports module — available to Sales Head and above — provides pre-built analytical reports covering all key sales metrics.

Available Reports

Report	What It Shows
Lead Pipeline Analysis	Leads by stage, count, and aging
Deal Forecast	Open deals by stage, value, probability, and close date
Revenue Dashboard	Month-to-date, quarter-to-date, and year-to-date revenue vs. target
Team Performance	Activities, conversions, and lead counts per person
Activity Audit	All CRM actions logged by user
Lead Temperature Distribution	Breakdown of Hot, Warm, and Cold leads

All charts update automatically as new data is added to the CRM.

5.9 Targets

Overview

The Targets module (Sales Head and above) allows managers to set and track performance goals for individuals and teams.

Target Types

Target	Metric Tracked
Revenue Target	Total deal value to close in a period
Lead Target	Number of new leads to add
Deal Count Target	Number of deals to close
Conversion Target	Percentage of pipeline entries to convert to leads

Setting a Target

1. Go to Target settings
2. Click + Set Target

5.12 Security Logs

[Security Logs Screenshot]

Overview

Security Logs — available to Super Admin and Sales Head — provide a complete audit trail of all actions taken within the CRM.

Tracked Events

Event	Details Recorded
Login / Logout	Timestamp, IP address, browser
Failed login attempt	IP address, timestamp, attempt count
Record created	User, module, record ID, timestamp
Record edited	User, field changed, old value, new value, timestamp
Record deleted	User, record details, timestamp
Data export	User, export type, number of records
Bulk operations	User, operation type, affected records

Using Security Logs

1. Go to Security Logs in the sidebar.
2. Use filters to narrow down:
 - by user, date range, event type, or module
3. Click any row to see the full details of what changed.
4. Click Export to

5.13 Settings

Overview

System settings are accessible to Super Admin and Sales Head.

Available Configurations

Setting	Description
Company Profile	Company name, logo, timezone
Currency	Configured as Indian Rupee with Lakh and Crore formatting
Email Notifications	Toggle notifications for follow-ups, meetings, and mentions
Meeting Reminders	Set reminders at 15 minutes, 30 minutes, or 1 hour before a meeting
Password Policy	Minimum length and complexity requirements
Session Timeout	Automatically log out after a period of inactivity
Login Attempt Limits	Lock account after a set number of failed attempts
DSR Schedule	Enable or disable the automated DSR and set the send time

5.14 Chat

Overview

The built-in Chat module enables real-time messaging between team members without leaving the CRM.

5.15 ARIA — AI Sales Assistant

[ARIA Screenshot]

Overview

ARIA (AI Revenue Intelligence Assistant) is Ccentrik's built-in AI agent. It has live access to your CRM data and can answer questions, analyse deals, and help you take actions — all without leaving your current page.

Accessing ARIA

Method 1: Click the Brain icon in the header (available on every page). This opens the ARIA floating panel on the right side of your screen while you stay on your current module.

Method 2: Click Ccentrik AI in the sidebar for the full-screen AI chat interface.

What ARIA Can Do

Capability	Example Message
Query live CRM data	"Show me all hot leads"
Pipeline summary	"What is my total pipeline value?"
Stale deal analysis	"Which deals have not been updated in 7 days?"
Today's follow-ups	"What do I need to follow up on today?"
Create records	"Create a task: Call Nikon tomorrow at 10 AM"
Log activities	"Log a call with Rahul at ABC Corp"
Assign leads	"Assign the TechCorp lead to Priya"

How ARIA Works

ARIA reads your CRM data in real time. When you ask a question, it queries the live database before answering — it never guesses or uses outdated data.

For write actions such as creating or updating records, ARIA always shows you a confirmation card before executing. You must click Approve for the action to proceed. ARIA never modifies your data without your explicit approval.

Context Awareness

ARIA knows which page you are on. If you are on the Leads page and ask "show me hot ones," it will immediately query hot leads — no need to specify the module each time.

Language Support

ARIA understands and responds in English, Hindi, and Hinglish. Write to it in whichever language is most comfortable for you.

CHAPTER 6 — END-TO-END CRM WORKFLOW

This chapter explains the complete sales process from initial prospecting to deal closure.

STEP 1: Login

Open ccentrik-crm.web.app and sign in with your credentials

|
v

STEP 2: Check Dashboard

Review overdue activities, today's meetings, and deals needing attention

|
v

STEP 3: Add Prospect to Pipeline

Pipeline > + Add Prospect > Fill in company details > Save

|
v

STEP 4: Research and Qualify

Update pipeline stage: New Prospect > Engaged > Qualified

Log activities (calls, emails) as you reach out

|
v

STEP 5: Convert to Lead

Click Convert on the pipeline record > Confirm

Lead is created with unique LEAD-XXXX code

|
v

STEP 6: Work the Lead

Log all interactions in Activities

Schedule Meetings as interest grows

Update Lead Temperature (Hot / Warm / Cold)

Update Lead Stage as progress is made

|
v

STEP 7: Send Proposal > Convert to Deal

Click "Mark Proposal Sent" on the lead

A Deal is created with deal value and close date

|
v

STEP 8: Manage the Deal

Track the deal in the Deals Kanban Board

Drag the card through stages as progress is made

Log activities and meetings against the deal

|
v

STEP 9: Close the Deal

Click "Mark Won" (or "Mark Lost" with reason)

Won deal contributes to Revenue Won metric

Optionally convert to Customer record

At 9 PM IST, the DSR is automatically emailed to Sales Heads and Admins

All of today's activities, leads, and deals are summarised automatically

CHAPTER 7 — COMMON BUSINESS SCENARIOS

Scenario 1: Adding a New Prospect from a LinkedIn Search

CHAPTER 8 — FREQUENTLY ASKED QUESTIONS

Q: I cannot log in. What should I do?

A: Ensure you are entering your username only — do not include @ccentrik.com, as the system adds it automatically. Check that Caps Lock is off. If you have forgotten your password, click the "Forgot Password?" link on the login page and follow the instructions in the email you receive.

Q: I cannot see the Reports or Analytics module in the sidebar.

A: These modules are only visible to Sales Head and Super Admin roles. If you believe you need access, contact your Super Admin to review your role assignment.

Q: I cannot convert a prospect to a Lead.

A: A Pipeline record must have either an email address or a phone number before it can be converted. Edit the record, add the missing contact detail, and then try converting again.

Q: A record shows as locked and I cannot edit it.

A: Records can be locked by a Sales Head or Super Admin to prevent accidental changes. Contact your manager to have the record unlocked.

Q: The DSR email is not arriving. What should I check?

A: First check your spam or junk folder. If the email is not there, ask your Super Admin to verify that your email address is in the DSR recipient list and that the automatic scheduler is enabled in Settings.

Q: I accidentally marked a deal as Lost. Can it be reversed?

A: Yes. Open the deal and look for the Revert to Lead or Revert to Pipeline option depending on where the deal originated. Contact your Sales Head if these options are not visible.

Q: Can I import leads from an Excel file?

A: Yes. Download the CSV template by clicking the Import button in Leads or Pipeline. Fill in your data in Excel, save the file as CSV format, and then upload it using the Import button.

Q: How do I know if my email to a client was opened?

A: Go to the Activity log for that lead or deal. Emails sent via the Email Integration show open and click tracking status once the recipient interacts with the email.

Q: Can ARIA create records without my approval?

A: No. ARIA always shows a confirmation card describing exactly what it will do before making any changes. You must explicitly click Approve for any write action to proceed.

Q: Why does the Dashboard show old data even after I add records?

A: The Dashboard refreshes automatically when you navigate to it. If you see stale data, click the refresh icon on any widget or do a full page reload using Ctrl+Shift+R on Windows.

Q: Can I use the CRM on my mobile phone?

A: Yes. Ccentrik CRM is designed to work on mobile browsers. Open the URL in Chrome or Safari on your phone. The layout adjusts automatically for smaller screens.

Q: How do I change my password?

A: Click your profile avatar in the top-right corner, go to Account Settings, and select Change Password. If you cannot log in to do this, use the "Forgot Password?" link on the login page.

CHAPTER 9 — TROUBLESHOOTING

9.1 Login Problems

Problem	Solution
"Invalid credentials" error	Check username (no @ccentrik.com needed) and password; check Caps Lock
Account appears locked	Contact Super Admin — too many failed login attempts may lock the account
Google Sign-In not working	Ensure you are using a @ccentrik.com Google Workspace account
Blank screen after login	Clear browser cache using Ctrl+Shift+Del and try again
Redirected back to login immediately	Session has expired — log in again

9.2 Missing Features or Permissions

Problem	Solution
Module not visible in sidebar	Your role does not have access — contact Super Admin to review your role
Cannot edit a record	Record may be locked — ask Sales Head to unlock it
Cannot delete a record	Deletion requires Sales Head or Super Admin role
Cannot reassign a record	Reassignment requires Sales Head or higher
Cannot see other team members' records	Normal for Sales Employee role — only own assigned records are visible

9.3 Import and Export Issues

Problem	Solution
CSV import shows validation errors	Use the downloaded template — column headers must match exactly
Duplicate records appearing on import	System detects duplicates by company name and email — review the preview before confirming
Export file not downloading	Check browser download settings; ensure downloads are allowed from the site
Fields missing from export	Some fields are excluded from basic export — use the Reports module for comprehensive exports

9.4 Activities and Meetings

Problem	Solution
Calendar invite not received by attendees	Verify attendee email addresses are correct; ask them to check their spam folder
Meeting conflict warning appearing	The system detected an existing meeting at the same time — reschedule to a different slot
Activity not appearing in today's DSR	Activities must be logged on the same calendar day to appear in that day's DSR
Cannot mark an activity as Done	The activity may be assigned to another user — contact the assignee or your manager

9.5 Common User Mistakes to Avoid

Mistake	Correct Approach
Including @ccentrik.com in the username field	Enter only the username portion before the @ symbol
Creating duplicate leads for the same company	Search before adding — use the search bar or filters to check if the company already exists
Not linking activities to leads or deals	Always select the related record when logging an activity to keep history clean
Setting a follow-up date in the past	The Activity Strip shows overdue items in red — update the date or mark the task complete
Leaving deal stage as New for weeks	Update the stage after every meaningful interaction — the stage reflects actual pipeline health
Not writing remarks after calls	Notes help your team (and future you) understand the context when reviewing a record later

CHAPTER 10 — BEST PRACTICES

10.1 Recommended Daily Routine

Morning — Start of Day

1.

Log in and open the Dashboard

2.

Check the Overview tab in the Smart Activity Strip

— resolve the first before restarting new work

3.

Review the Today tab — pla

n y

During the Day

5. Log every call, email, and meeting in Activities immediately after it happens — memory fades quickly
6. Update lead stages and deal stages as progress is made — do not let records sit at old stages
7. Respond to follow-up reminders promptly to maintain momentum with prospects

End of Day

8. Review the Today tab — mark completed tasks as Done
9. Set follow-up dates for any open items so they appear as reminders tomorrow
10. The DSR will be sent automatically at 9 PM IST — no action required
